

VERSION WITH MARKINGS TO SHOW CHANGES MADE

1. (currently amended) An electronic circuit for ~~controlling~~ both striking and continuously lighting a gas discharge lamp, the circuit comprising generation means for generating a high frequency pulse train that may be applied to the electrodes of the lamp to light continuously the lamp, means by which the generation means may be connected to an electrical power source, a choke to limit the current drawn by the lamp, characterized in that the circuit comprises a first pulse generating means for producing a first high frequency series of pulses and a second pulse generating means for producing independently of the first series of pulses a second high frequency series of pulses, and means for combining additively the first and second high frequency series of pulses to produce the high frequency pulse train.

REMARKS

In reviewing a copy of the Response dated 05 May 2003, it was noted that a clean copy of the amended claim (claim 1) may have been inadvertently omitted. Accordingly, a clean copy of a Claim 1 is submitted herewith, including the amendments that were made in the response of 05 May 2003.

If there is any matter that can be expedited by consultation with Applicant's attorney, such would be welcome. Applicant's attorney can normally be reached at the telephone number given below.

Signed at Bellingham, County of Whatcom, State of Washington this 12th day of June 2003.

Respectfully submitted,

DAVID JOHN AARONS
